Informatics Engineering graduate with a strong background in system analysis and IT project development. Passionate about technology and problem-solving, I have expertise in Python, Java, SQL, HTML, CSS, PHP, and JavaScript, along with hands-on experience in Machine Learning, Deep Learning, and Natural Language Processing (NLP). Skilled in Web Application Development and proficient in Microsoft Word, Excel, and PowerPoint. Beyond technical skills, I have high creativity in communication and public speaking, bringing creativity to both technical and non-technical discussions. Adaptable, fast-learning, and eager to take on challenges, I am highly interested in IT Officer Development Programs and committed to contributing as an IT Officer.

WORK EXPERIENCES

Accenture – Kuala Lumpur, Malaysia

Digital Data Reviewer

June 2025 – Present

- Review, analysed and validated digital content and data to ensure accuracy, quality, and policy compliance
- Monitored data for inconsistencies, errors, and potential risks, following strict client and internal guidelines.
- Applied critical thinking and attention to detail to maintain high standards of data integrity.
- Collaborated with team members and quality analyst to meet productivity and quality targets.

PT. Kilang Pertamina Internasional RU III - Palembang, Sumatera Selatan, Indonesia

Web Developer

November 2023 – December 2023

- Build an inventory website for recording outgoing, incoming, damaged, good, and available items in the warehouse to facilitate more than 30 employees in the SSC ICT office.
- Became the project leader in developing the website in SSC ICT Office
- Build website concepts and monitor progress to achieve the completion on time.
- Responsible for building back end website program using codeigniter
- As a project leader, I monitor and assist front end program and database to avoid errors and mistakes.

Freelance – Palembang, Sumatera Selatan, Indonesia

3D Building Design

January 2025

- Discussed everything related to the design of the building that the client wanted.
- Build a 3-dimensional warehouse building design using Sketch Up application

Sriwijaya Digital Conference – Palembang, Sumatera Selatan, Indonesia

Master Of Ceremony

December 2024

- Hosted the biggest digital conference in Palembang, organized by Palembang Digital and Sriwijaya Digital Conference.
- Led a 2-day hybrid event (offline & online) attended by 100 participants, including industry experts and professionals.
- Engaged with guest speakers from various industries, moderating discussions on AI, business, and public speaking.
- Facilitated Q&A sessions and networking activities, ensuring an interactive experience for attendees.

SRIFOTON – Palembang, Sumatera Selatan, Indonesia

Master Of Ceremony

October 2022

- Hosted the opening and closing ceremonies of Srifoton's national events and moderated Srifoton's national webinar over a span of two days.
- Managed the flow of both offline and online sessions, ensuring seamless transitions between speakers and activities for 100+ participants.
- Maintained a lively and engaging atmosphere, adapting communication styles to suit different segments of the event.
- Collaborated with 20+ committee members to prepare event scripts, technical run-throughs, and time management for a smooth execution.

PROJECTS

Chatbot System For Tourist Information In Palembang City (Thesis Project)

- Developed a tourism chatbot using LSTM and Natural Language Processing (NLP) to assist visitors in Palembang.
- Collected and processed primary data from official government websites, social media, and online sources for training.
- Built and trained an AI model to improve chatbot accuracy in responding to user queries.
- Developed a web-based interface for real-time interaction.
- Gained expertise in machine learning, data preprocessing, NLP, and web development.

Personal Portfolio Website

- Designed and developed a responsive personal portfolio website to showcase projects, skills, and experiences in a clean and modern layout.
- Implemented layout using HTML structure, styled components with custom CSS, and enhanced responsiveness with Bootstrap framework.
- Integrated smooth navigation, skill sections, contact form, and project galleries for better user experience.
- Applied responsive design principles to ensure compatibility across desktop, tablet, and mobile devices.

Face Recognition Attendance System

- Developed an automated attendance system using Face Recognition based on the HOG (Histogram of Oriented Gradients) method and Python.
- Utilized OpenCV for real-time video capture and face detection, then compared features with known encodings for accurate identity verification.
- Successfully integrated the system with Microsoft Excel to automatically record and update attendance logs, including timestamps.
- Optimized recognition performance for multiple users in varying lighting conditions and camera angles.
- Learned hands-on application of computer vision techniques, real-time data handling, and Excel automation.

EDUCATION

SRIWIJAYA UNIVERSITY – Palembang, Sumatera Selatan

August 2021 – February 2025

Bachelor of Computer Science, Informatics Engineering; Cumulative GPA: 3.95/4.0

- Fastest graduation in 3.5 years with Cumlaude predicate
- Studies focused on software development and project management
- 3rd place as the 2021 UNSRI Faculty of Computer Science Education Ambassador. Competing against 24 finalists who have been selected from various stages. Being a role model and a voice on technology.
- Steering Committee of Bujang Gadis Faculty of Computer Science UNSRI. Responsible for supervising and coordinating the event flow and finalist development. Contributed to the successful execution of a faculty-level ambassador competition by managing team collaboration and ensuring smooth event operations.
